About Me

I am self-motivated, reliable, responsible, a team worker adaptable to challenging situations. I am able to work both in a group environment as well as using own initiative. Direct communication is my essential approach. I can work under pressure and adjust to strict deadlines.

Education

Akdeniz University

Bachelor in Electrical Engineering

- **Coursework:** Power Systems, Power Electronics, Digital Electronics, Circuits and Devices, Electrical Machines and Drives, Basics of Computer Science

Experience

Freelance Full-Stack Developer   *Remote*
                                                                         Jan 2024 – Present

- Designed and developed responsive web applications using React, Next.js on the frontend, and Node.js, Express, MongoDB on the backend.
- Implemented performance optimization strategies such as lazy loading and caching, ensuring fast and scalable applications.
- Handled end-to-end project responsibilities, including client consultation, development, testing, and deployment on platforms like AWS and DigitalOcean.
- I loved the flexibility and challenge of freelance work, and I think these experiences helped me grow, not just as a developer, but in understanding how to better solve real-world problems for different types of businesses.

Front-End Developer   *Antalya, Turkey*
Saritay Bilisim   *Jan 2022 – Jan 2024*

- I worked on several different projects, including 'otelihtiyac' an online sales platform that aims to facilitate trade between hotels and suppliers. 'Dokitari' - a cross-platform healthcare application, aiming to improve communication, appointments, health analysis and reports between users and hospitals.
- My role involved implementing UI designs, animations, and creating reusable, dynamic components while adding bug-free functionalities. I contributed to both the web and mobile applications of the projects.
- I left this role because it was no longer suitable for my personal development.

Software Engineer Intern   *Antalya, Turkey*
Saritay Bilisim   *Nov 2021 – Jan 2022*

- I began learning Front-End basics like HTML,CSS,JavaScript and React, while directly taking part in projects.

Technologies

Front End Technologies: HTML, CSS, Bootstrap, Tailwind, JavaScript, TypeScript, React, React-Native, Next.js, Angular

Back End Technologies: C++, Python, Node.js, Express.js, MongoDB

Other Technologies: ContextAPI, REST APIs, Expo Go, Redux, Firebase, AWS, Git, PostgreSQL
